

**YOUR TRUSTED PARTNER FOR INDUSTRIAL HEATING , COOLONG
, ENERGY RECOVERY, & UTILITY OPTIMIZATION SOLUTION.**

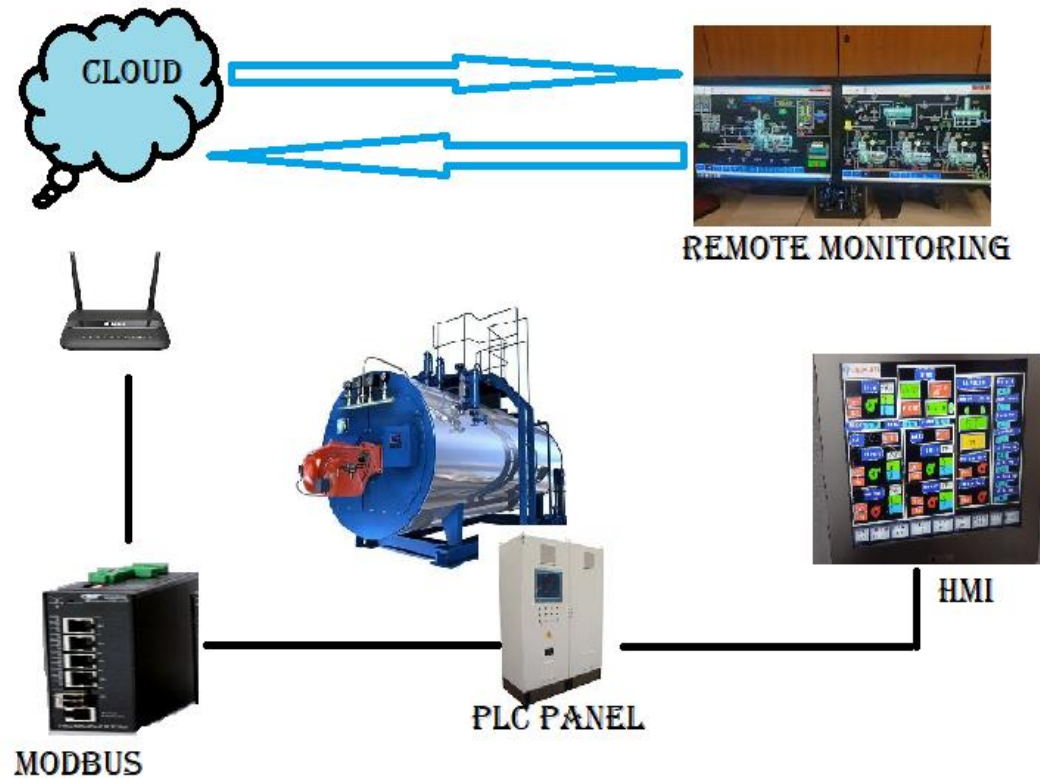

A LITTLE ABOUT ANTRIXX

Our current team is already handling (Sales & Service) industrial/urban equipment's like Boilers, Thermic fluid heaters ,hot water generators , process steam heating & water treatment plant.

OUR PRODUCT & SERVICE

- ❖ UTILITY REMOTE MONITORING SYSTEM
- ❖ BOILER AUTMATION.
- ❖ POLUTION CONTROL EQUIPMENT
- ❖ ASH HANDLING SYSTEM
- ❖ FUEL HANDLING SYSTEM
- ❖ STEAM ENGINEERING AUTOMATION
- ❖ BOILER & WATER TREATMENT SPARE.
- ❖ HEATING SOLUTION FOR PROCESS
- ❖ STEAM & ENERGY LOSS DIAGONESIS.
- ❖ RETROFITTING OF BOILER.
- ❖ PROJECT CONSULTATION & MANAGEMENT.
- ❖ HEAT PUMP & CHILLING SYSTEM BOP MANAGEMENT..

BOILER AUTOMATION & REMOTE PERFORMANCE MONITORING SYSTEM

AUTO DRAFT CONTROL SYSTEM

AUTO COMBUSTION CONTROL

DRUM LEVEL CONTROL

POLLUTION CONTROL EQUIPMENT

Clean Air. Compliant Operation. Sustainable Tomorrow.

CYCLONE DUST COLLECTOR

Cyclone dust collector use centrifugal force to efficiently separate and capture large Dust particles , offering low maintenance, cost-effective air filtration.

BAG FILTER

Bag filter are high-efficiency dust collection system that capture fine particles using fabric filter bags, ensuring clean air, environmental compliance, and reliable performances across various industrial application. We maintain AIR to CLOTH ratio 1.0

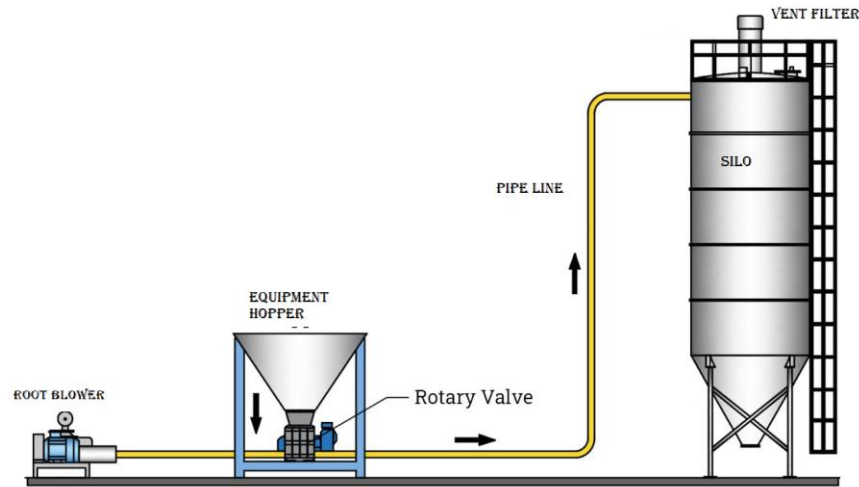

WET SCRUBBER WITH WATER FILTRATION SYSTEM

Spray type wet scrubber efficiently dust and gas pollutants using water sprays. The integrated water filtration system treat contaminated water, enabling its reuse- ensuring environmental compliance, reduce water wastage, and sustainable industrial operation.

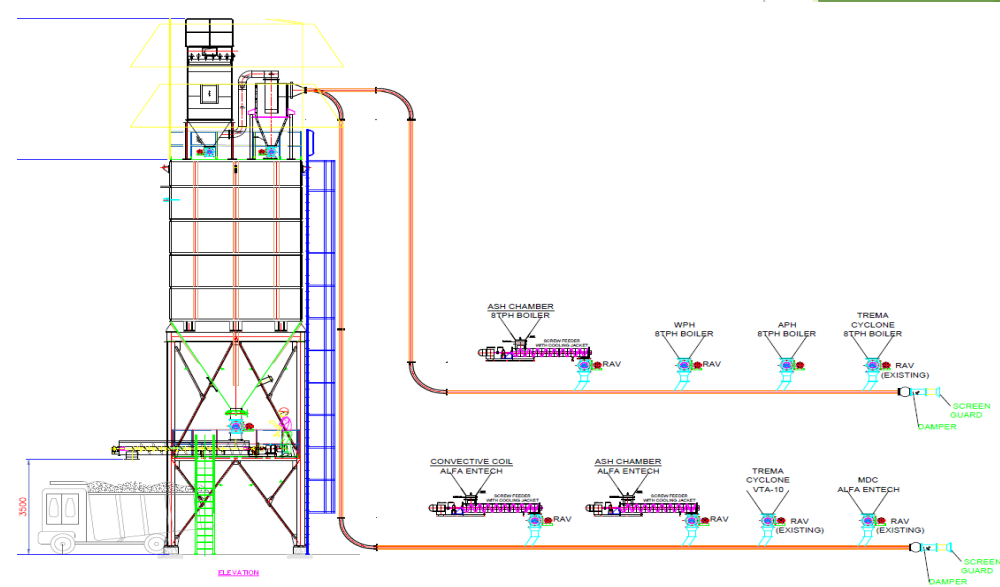

ASH HANDLING SYSTEM

Swift . Clean . Efficient ash transfer. Lean flow ,
Maximum efficiency.

LOW PRESSURE CONVEYING

Low pressure ash conveying system use air at low velocity to transport ash efficiently over short distance . They are cost effective but limited by lower conveying capacity and not idle for too many bend and long distance.

VACUUM ASH CONVEYING SYSTEM

Vacuum ash conveying system use negative pressure to efficiently extract ash from multiple collection point. Ideal for clean and enclosed transport. However they are limited in conveying distance and capacity, making them more suitable for small to medium scale operation where precision, cleanliness, and flexible layout are critical.

FUAL HANDLING SYSTEM

Fuel Flow, Seamlessly controlled. Precision in every Load.

We offer complete fuel handling solution designed to meet the rigorous demand of modern industries using solid fuel like rice husk, coal, briquets, and wood chips. Our system ensure continuous, safe and energy-efficient feeding of fuel to your boiler and furnace.

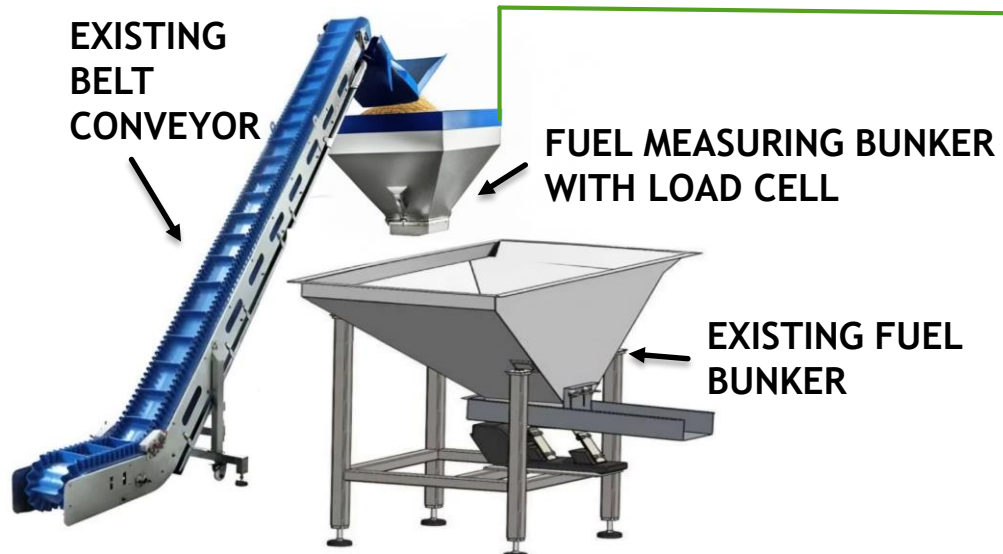

OUR SCOPE OF SUPPLY

- ❑ Fuel storage yard HOPPER , SILO
- ❑ Belt / Screw / Chain conveyor.
- ❑ Crusser & Screening unit.
- ❑ Fuel Elevator / Bucket Elevator
- ❑ Fuel Feeder to Boiler furnace.
- ❑ Control & Automation Panel.

STEAM FUEL TRACKER

STEAM FUEL TRACKER - THE INTELLIGENT DATA LOGGING SYSTEM
FOR INDUSTRIAL SAVING.

PLC & 7" HMI

STEAM FUEL TRACKER is a smart data logging system using industry type load cell & steam flow meter to monitor fuel consumption , steam generation, and steam to fuel ration. Intricated PLC with SCADA , it provide real-time insights , helping industries optimize energy usage, control cost, and enhance operational efficiency

STEAM FLOW
METER

STEAM ENGINEERING AUTOMATION

Your partner in smart steam Engineering – Think steam , Think smart , Think ANTRIXX.

Unlock unmatched efficiency and precision with our cutting-edge steam engineering Automation solution. From smart trap monitoring and real-time steam flow control to automated blowdown and PLC Hmi integration, our product are design to maximize saving, minimize losses , and ensure flawless operation. Experience the power of intelligent steam, built for the future industry.

- ❑ Steam Flow monitoring system.
- ❑ Thermic fluid heat meter.
- ❑ Boiler TDS control Automation.
- ❑ Flash steam recovery system.
- ❑ Actuated steam valve system
- ❑ Pressure Reducing station.
- ❑ Auto temperature control valve.
- ❑ SCADA for steam system.

BOILER , BAGFILTER & WATER TREATMENT SPARE.

SMART SPARE – ZERO DOWNTIME.

We deliver precision - engineered spare parts for Boiler , Bag filter & water treatment system- all under one roof. Whether its boiler , steam line , filter cage, filter bag , membrane , or dosing pump, Our high performance spares ensure zero down time, smooth operation, and maximum plant efficiency.

FAST DISPATCH. TRUSTED QUALITY. INDUSTRIAL - GRADE RELIABILITY.

STEAM & ENERGY LOSS DIAGNOSIS

UNCOVER HIDDEN LOSSES. UNLOCK ENERGY EFFICIENCY

Our steam and energy loss diagnosis is specialized service design to identify steam leak, trap failure , insulation losses, boiler efficiency , condensate insufficiency across your plant. Using thermal imaging , ultrasonic detectors, flow meters, O2 analyser , Unburned ash report , fuel analysis report & practical steam engineering expertise, we provide a data- backed report showing where energy is lost - and how much it costing you.

What we cover

- ❑ Steam line leak detection
- ❑ Trap testing
- ❑ Insulation & performance check
- ❑ Boiler Efficiency measurement by direct & indirect method.
- ❑ PRV station efficiency
- ❑ Condensate recovery & flash steam losses.
- ❑ Fuel to steam ratio analysis.

Deliverable

- ❑ Detail loss quantification.
- ❑ Actionable recommendation
- ❑ ROI based solution plan
- ❑ Optional : Retrofit or automation proposal.

RETRO FITTING OF BOILER & THERMIC FLUID HEATER

SMART UPGRADES FOR SMARTER HEATING.

At ANTRIXX TECHNOLOGY, we specialize in retrofitting old or underperformance boilers and thermic fluid heater with modern energy efficient, and automation-ready component. Our retrofitting solution are designed to enhance fuel conversion, fuel efficiency, improve safety, reduce emission, and maximized system reliability - all with out the cost of a complete replacement.

Our Retrofitting services include

- ❑ Furnace modification for different fuel
- ❑ PLC HMI base control system integration to reduce unburnt loss.
- ❑ Economizer & pre heater installation
- ❑ TDS blow down automation & steam trap upgrades
- ❑ Insulation & refractory enhancement
- ❑ Integration with condensate & flash steam recovery system.

PROJECT CONSULTATION & MANAGEMENT.

WE BUILD MORE THAN UTILITY BALANCE OF PLANT- WE BUILD EFFICIENCY.

At ANTRIXX TECHNOLOGY , we provide end-to-end consultation and project management for setting up Boiler houses and thermic fluid heater system , Cooling system BOP customized for your industry's heat and energy & cooling energy demand. Our experience team ensure every step , from design, layout planning , equipment selection fuel system integration, to commissioning is handled with precision and efficiency.

Whether you are building a new unit or upgrading an existing one , we focus on:

- ❖ Optimal thermal performance
- ❖ Smart space utilization
- ❖ Compliance with safety & emission norms
- ❖ Energy saving design and automation - ready infrastructure.

FROM INTITIAL CONCEPT TO FULLY OPERATIONAL BOILER/ HEATER HOUSE , WE DELIVER PROJECT THAT PERFORM , SAVE , AND LAST.

HEAT PUMP & CHILLING SYSTEM BALANCE OF PLANT MANAGEMENT.

INTEGRATED HEAT PUMP & CHILLING SOLUTION FOR INDUSTRIAL EXCELLENCE

OUR EXPERTISE

- INDUSTRIAL HEAT PUMP SYSTEMS
- CHILLING WATER SYSTEM
- COMPLETE BALANCE OF PLANT ENGINEERING.

OUR SERVICE

- SYSTEM DESIGN & ENGINEERING.
- EQUIPMENT SUPPLY & INSTALLATION
- PIPING & UTILITY INTEGRATION
- ENERGY & EFFICIENCY IMPROVEMENT.
- TESTING , COMMISSIONING & TRAINNING

ANTRIXX TECHNOLOGY transforms industrial heating and cooling challenges into energy- efficient , sustainable, and cost- effective solution through innovative engineering and reliable execution
